The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagao et al.

Claim 1 recites a “plastic” bracket. “Plastic”, in its broadest sense, includes any material (including metals) which can be shaped or formed<sup>1</sup>. Thus, the claim is not limited to nonmetallic materials based on hydrocarbons, polymers, etc. Thus, bracket 16 of Nagao et al., formed by bending aluminum alloy plate, clearly can be considered “plastic”. Note notches 20, 21 and protrusions 15a regarding the claimed “deviation” and “irregularity”.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Tokutake.

Note the Fig. 7 embodiment in particular. Note dimple 32a and port 6b regarding the claimed “deviation” and “irregularity”. Regarding claim 4, see lines 40-42 of column 4. The edges of the flanges of contacting member 32 will inherently be closer together than the diameter of the header pipe if they extend more than half the periphery of the header.

---

<sup>1</sup> Dictionaries define plastic as a synonym of malleable; both words mean “capable of being shaped or formed, as by hammering or pressure: A malleable metal”.

Art Unit: 3753

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kent et al. and Southwick et al. teach mounting brackets made of molded plastic.
